Priority access to online services
Be the first to use newly developed online applications and services and take your business to the next level.

Ensure business continuity
Always have up to date Priva software to ensure the security and performance of your systems.
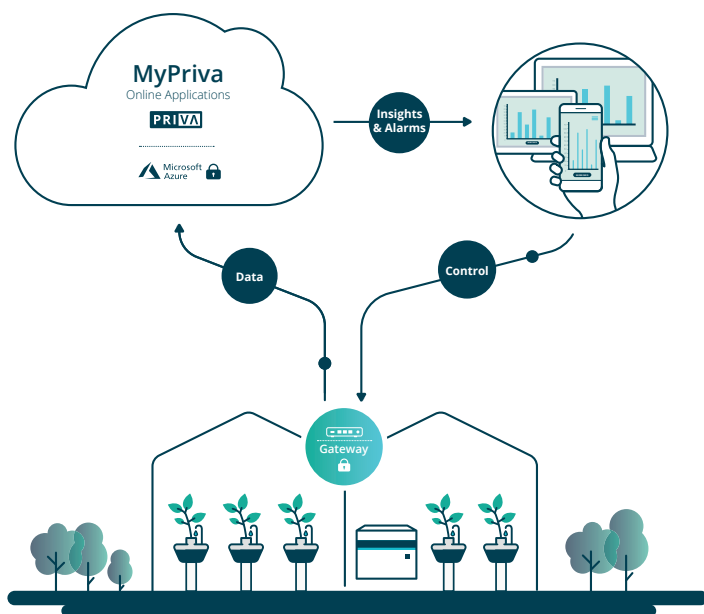

Priva Connected is a service package that gives you access to multiple online applications and services to operate your crop production facility remotely. Whether on site or at home, you can manage your operations by using your smartphone, tablet or laptop. Anytime and anywhere.

Priva Operator
Manage your climate and operate your site remotely.
With Operator, you can monitor and manage your crop remotely. The online application that makes operating your Priva process computer easy and convenient. View settings and measurements of your crop production facility in real time and adjust a strategy or setting directly to your liking. Anytime and anywhere, simply using your smartphone, tablet or laptop. You can also manage multiple sites from one place.

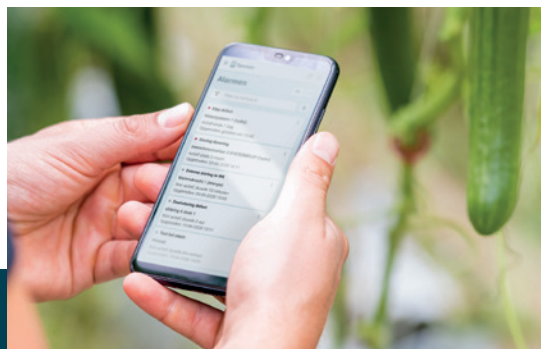

CREATING A CLIMATE FOR GROWTH

PRIVA

Priva Alarms
Stay informed of all your active and historical alarms in your Priva Control Systems.

Alarms provides you with an overview of all alarms linked to the Priva systems at your horticultural business. It alerts you when an alarm is activated and gives you detailed information while you are on the go.

Priva Access Control
Manage users and access to Priva products and services.

Access Control allows you to manage the users in your cloud environment. You can give access and manage the user rights for your co-workers, partners or consultants directly within the app, for easy optimization of your workflow.

Support, consultancy and online training

When you start using Priva Connected, in addition to the online applications, you will receive free online support via the Priva Help Center and from our help desk specialists. The package also includes personalized advice from our consultants. On top of that, you will also have free access to the Priva Academy. This online training platform offers courses on various topics that growers deal with on a daily basis.

Ensure business continuity with up to date Priva software

With the Connected package, you will receive continuous software updates to ensure you always have a future-proof solution with the latest software. Online applications are updated automatically, and you'll receive notifications about new features.

Connext and Compact CC process computers will require new software to be installed by your Priva partner. For the performance and security of your systems, it is important that your software is up to date.

Easy & remote process control	Always up to date software	Priority access to new applications & services	Instant overview of alarms	Access to online training courses	Consultancy & support
